

SITE LEVELING

STEP 1: Make sure to call 811 if you're unsure about utility lines.

STEP 2: Measure the width of your carport and place stakes accordingly. Square up stakes as necessary.

STEP 3: Run string between stakes and apply string level.

STEP 4: Record elevation changes, subtract your shortest measurement from the highest and you'll have how many inches off level the land is. *(Must be within 4")*

Garage doors close correctly when installed on level ground, preventing exposure to elements.

Garage door will NOT close and walk-in doors can not be installed on unlevelled ground.

Prevent use of concrete blocks and an interior exposed to the elements by leveling your land first!
